

CROSS-CULTURAL TRAINING

This one day workshop is an ideal forum to introduce employees who work cross-border to the differing cultural values, attitudes, behaviours and business practices that they will encounter whilst operating internationally.

Improving their cultural awareness and providing practical guidance on different working practices, expectations and communication styles will enable them to operate more effectively both internally and externally across global markets.

Our programmes include:

- General cultural awareness training
- Country-specific workshops
- Region-specific workshops

Each programme is bespoke and will be devised following a briefing with the client.

Format One-day workshop, face-to-face. Or virtually two x half days.

Who should attend? Employees who work across borders with people from a range of different countries or who are relocating to another country.

Maximum number of delegates 8
